

ULTRAGUARD All-Season Diesel Fuel Treatment

Designed to improve diesel fuel quality and provide superior fuel system protection while restoring engine performance.

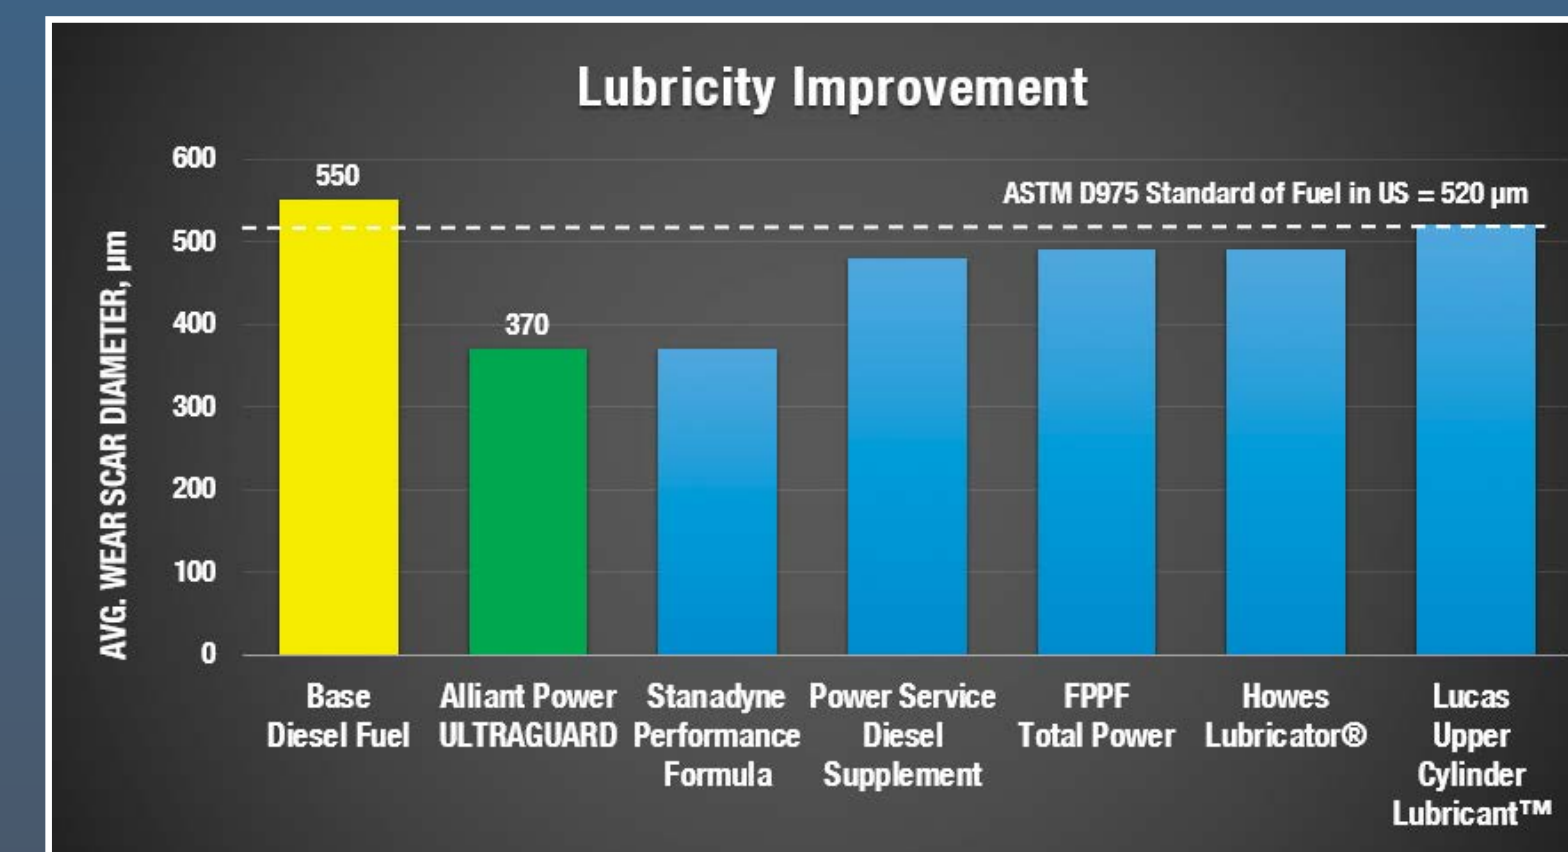

Benefits:

- Restores engine power, torque, and fuel economy
- Increases cetane for improving engine combustion, faster cold starting, and smoother running
- Cleans/Eliminates injector deposits
- Eliminates injector “stiction”
- Stabilizes fuel & protects against gums, varnishes, and rust/corrosion
- Lubricates fuel system
- Reduces ice formations of water in fuel
- Helps remove water
- Provides Anti-Gel protection
- Helps minimize particulates in exhaust aftertreatment systems (SCR & DPF)

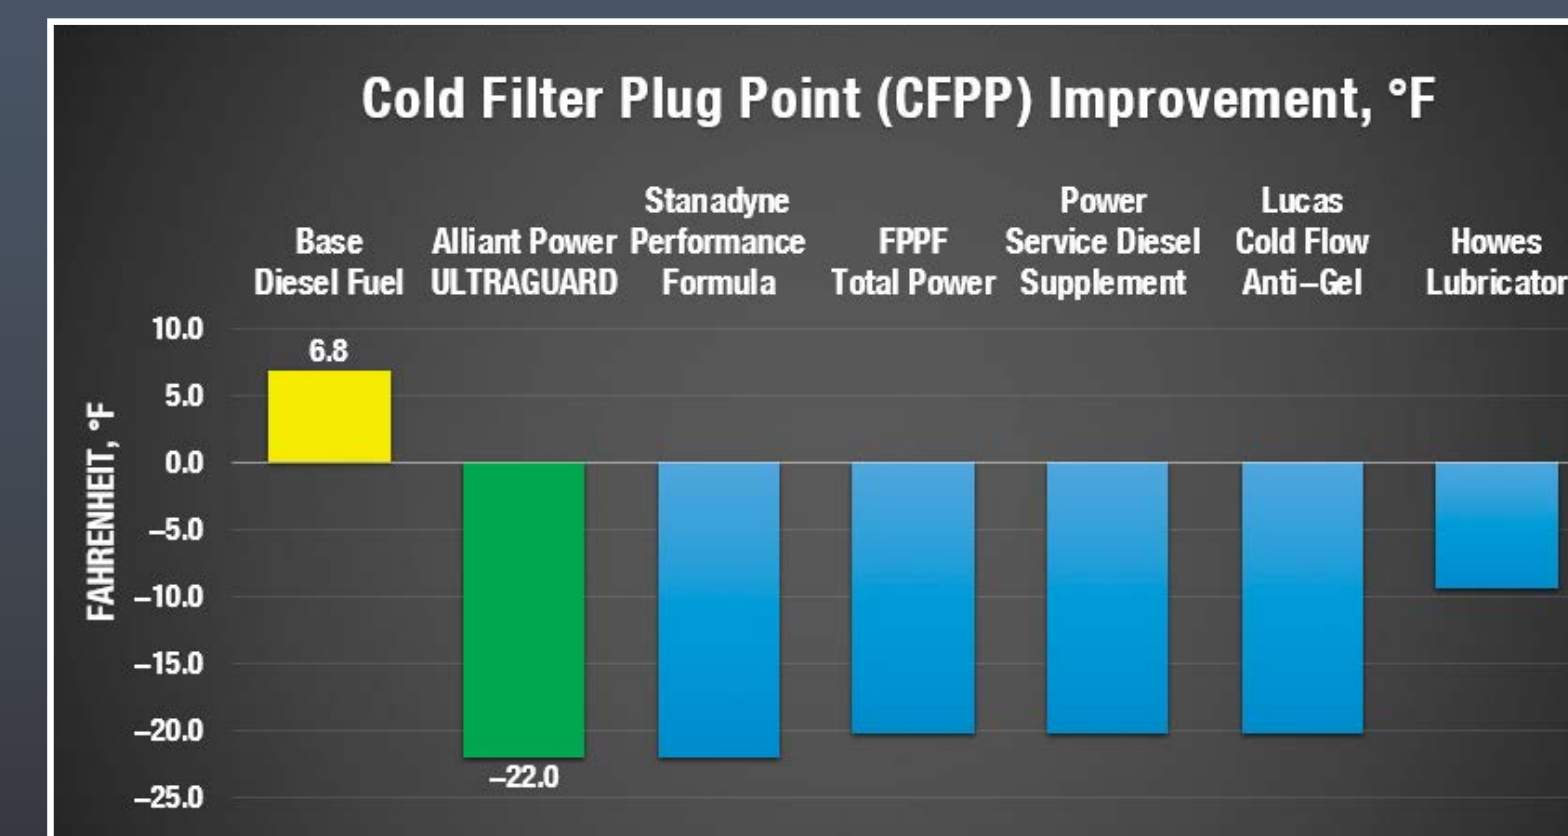

Competitive Testing*

Increasing cetane improves engine combustion resulting in faster cold starting and smooth engine running.

Improving lubricity minimizes wear of critical fuel system components. Best if wear scar is less than 520 micron.

Lowering CFPP reduces the risk of fuel gelling and will improve cold weather engine performance.
