

NPA 09/12

SUBJECT: AP63464 Internal Injector Harness

June 15, 2012

Alliant Power is pleased to announce the release of **AP63464** Internal Injector Harness used in the Navistar® applications listed below. This one piece harness was standard equipment on 1994–1999 model year engines and features a metal tray supporting the wiring harness with integral metal spill defectors. This harness is also the recommended replacement for the discontinued harness used on the 2000–2003 model year engines. Refer to Alliant Power Technical Bulletin [APTB 02/12](#) for more information.
