

## SUBJECT: Diesel Particulate Filters

Alliant Power is pleased to announce the release of **AP70131** and **AP70132**, Remanufactured Diesel Particulate Filter (DPF) Program for the applications listed in the table below.

These products are remanufactured by our OEM partner using their patented multi-step OEM approved remanufacturing process. This process is vastly superior to in-field cleaning machines removing up to 55% more ash, restoring the DPF back to like new condition. This ensures the end customer achieves maximum service life, fuel economy and engine performance. DPFs include the necessary gaskets for installation. DPF clamps and gaskets are also available separately, see [NPA 02/19](#) for further details.

Both products are backed by Alliant Power's 13-month, unlimited mileage warranty, as well as Alliant Power's technical support.

Product photographed for reference only. Each component sold separately.  
Not for sale or use in California.

### Diesel Particulate Filters (DPF)

AP part number	Application	OEM cross reference	DPF gasket	DPF clamp
AP70131	Cummins® ISB	5295603, 5295603RX	AP70302 (2)	AP70402 (2)
AP70132	Cummins ISX	5295605, 5295605RX	AP70301 (2)	AP70401 (2)

Alliant Power DPFs gaskets are included with each DPF and are also sold individually. Quantity indicated in the parentheses next to the parent number is the required gasket and clamp required for that particular application.
