SUBJECT: AP63462 Intake Manifold Air Temperature (IAT) Sensor

May 18, 2012

Alliant Power is pleased to announce the release of **AP63462** Intake Manifold Air Temperature (IAT) Sensor used in the Ford® and Navistar® applications listed below. This sensor is susceptible to carbon contamination that is introduced through the exhaust gas recirculation (EGR) system and is prone to connector damage when servicing the intake manifold or performing other repairs on the engine.
