4. Featured Products

Displays new products as well as products on promotion, showing the list price as well as your discounted price. Clicking on the part number will take you to a product information page. There is also a quick link for adding the product to you cart.

5. Sitemap Links

The sitemap provides quick links to a number of areas of the website, as well as some items that can only be found in the sitemap (Wish list, CA Prop 65, Help, etc.)

Quick Order Entry

There is a product search within the shopping cart that will allow you to add products quickly without going to the product information page with each selection. You also have the option to view other warehouses and select the desired warehouse before adding to the cart. Once you've added all desired products to the cart, click 'Recalculate' to populate the pricing.

Item Supersessions

Items that have superseded will display the supersession item number at the bottom of the product information page. If an item that has superseded is added to the cart, the latest part number will be automatically loaded into the cart.

Warehouses

Inventory availability is displayed based on your default warehouse location. You also have the option to check availability and ship from other warehouses by clicking the 'View Other Warehouses' button. Each order can ship from as many warehouse locations as desired. Bosch authorized dealers are able to view Bosch inventory in Atlanta and Ontario. Ordering from these warehouses will trigger a dropship to your specified location.

Freight Charges

Freight charges will be estimated on each order where available, based on product weight and shipping method. The freight charge estimate will be fairly accurate, even when shipping from multiple warehouses

Ship-To Addresses

You have the option to choose any ship-to address that have been saved on your account. You also have the option to add new ship-to addresses when placing an order. Once completed, the new address will be available to choose on future orders.

Blind Shipment

You have the option to mark an order as a Blind Shipment. This will prevent any paperwork from being sent with the order and the ship-from address on the shipping label will be the main address on your account.

Sub-Accounts (found in the Account link at the top of the webpage)

You have the option to manage and set up sub-accounts that are tied to you main customer account. This will allow you to set up as many users from your organization as you would like to be able to access the website under you customer account. You also have the option to set limits on these sub-accounts such as viewing options and order value limits.
