

SUBJECT: 7.3L Water Pump Application Update

AP63501 Water Pumps can be installed on 1994 or 1995 model year Ford® Power Strokes®. The heater hose fitting at the top of the pump being replaced is ½" NPT. The heater hose fitting threads on our replacement pump are 7/8-14 straight thread with O-ring. Your customer will need a bushing to adapt the existing fitting to the new pump or a new fitting.

Details are as Follows:

- Male 7/8-14 straight thread with O-ring to female ½" NPT adapter bushing

or

- New fitting part number F81Z-18599AA

Additionally, water pumps shipped from Alliant Power contain a new O-ring for the heater hose fitting.
